Greetings

In order for construction industry to secure its position on a solid foundation from which it will drive economic growth and not be affected by the changes in the economy, adoption of CM in construction projects is vital.

Hence, the construction industry practitioners will need to look beyond the deep rooted conservative business models and adopt CM for it to be propagated in the construction market. We give you our undertaking that we are committed to leading the way and do our utmost to enhance the CM services.

June 2012

Yung-Hwi BAE

Chairman

The Construction Management Association of Korea.

CMAK

The Construction Management Association of Korea

Welcome to CMAK

CMAK History

March 17, 2012

Becomes a member of APFPM
(Asia Pacific Federation of Project Management)

March 13, 2012

Signs MOU with CMAS
(Construction Management Association of Spain)

November 7, 2011

Renews MOU with CMAA
(Construction Management Association of America)

December 16, 2010

Signs MOU with CIOB
(The Chartered Institute of Building)

April 30, 2010

Declaration of International CM Day

October 17, 2006

Signs MOU with CMAA
(Construction Management Association of America)

June 9, 2006

Signs MOU with ICAK
(International Contractors Association of Korea)

March 6, 2003

The Ministry of Education Science and Technology designates CMAK as the agency for elective professional education.

January 21, 2003

The ministry of Public Administration and Security designates CMAK as the agency for elective professional education for regional public servants.

November 8, 2002

The Ministry of Construction and Transportation designates CMAK as the agency to appraise and make public the capacity of CM firms.

December 31, 2001

The Ministry of Construction and Transportation designates CMAK as the agency to confirm and publish the official documents of the CM services execution.

June 26, 1999

The Ministry of Construction and Transportation designates CMAK as the agency for professional education.

July 22, 1997

The Ministry of Construction and Transportation permits CMAK to be set up as a non-profit organization.

March 27, 1997

The Construction Management Association of Korea is founded.

CMAK Core Activities

1. Develop laws, regulations and policies related to CM

- Devise the mid to long-term plans in order to develop CM
- Put the related laws and regulations in order as well as improving them
- Devise the improvement in CM delivery system
- Propose CM related laws, regulations and policies to the government

2. Help develop CM related technology and workforce

- Education and training with substance
- Help analyze and utilize CM project case studies
- Develop the managing system of professionals
- Promote the related events in order to initiate techniques

3. Examine and research

- Conduct the research and development work
- Develop related laws and regulations in order to increase CM scope of work
- Research and study overseas laws, regulations and policies
- Help export CM to LDDC (least developed among developing countries)

CMAK Core Activities

4. Help promote the CM market

- Hold seminars and education and training for the purpose of promoting CM throughout the country
- Host events to monitor CM projects
- Have strategy meetings to promote CM
- Help increase the use of CM

5. Build the system in order to exchange and share the related information and data

- Build database with various CM related information
- Build system to provide and exchange information and data
- Strengthen international mutual cooperation

6. Reinforce the public relations

- Reinforce PR activities for wider use of CM
- Operate a CM-related consulting center at all times
- Publish CM brochures
- Publish CM handbooks
- Supply related information and data

7. Conduct the work entrusted from the government

- Appraise and make public the capacity of CM firms
- Maintain and manage results of CM practices in public projects
- Confirm and publish official documents of CM services carried out

8. General management

- Help reinforce activities of the five regional chapters
- Plan and arrange a variety of conferences and events
- Put in order the related regulations to promote the activities of CMAK
- Expand opportunities for members for self-development

Construction Management

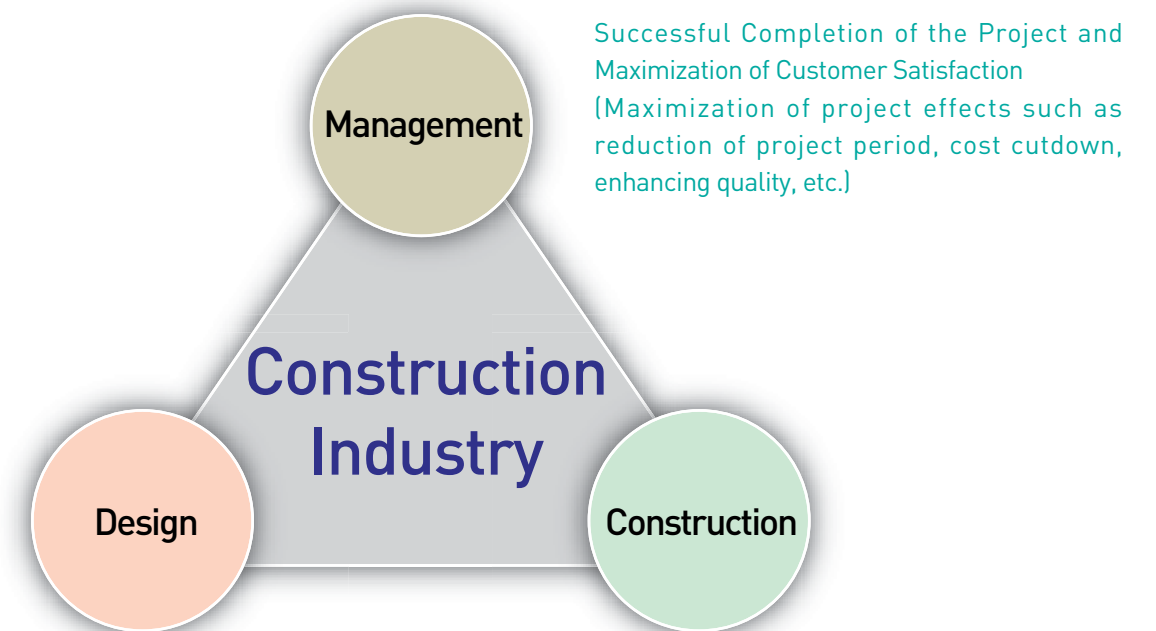

What is CM?

Definition

- CM can be defined as the comprehensive and vigorous construction managerial activities for a project from planning which is the initial phase of the project, to feasibility study, analysis, procurements, contracts, supervision, evaluations and post occupancy management.
- It also covers the whole or a part of managerial works in engineering (designing) and construction works to attain the maximum effects of the intended project.

What is CM?

The Scope and Performances of CM

(1) The Scope of CM

Owner CM or Agency CM

〈Examples〉

- Airport, railroad, electric railcar, subway, power plant, dam and plant projects.
- Development projects such as industrial city, innovative city, multifunctional administrative city, etc.
- Government building, cultural and art center, museum, science museum, display center, terminal, gymnasium, school, park and hospital projects.
- Express highway, river, water and sewerage, Saemangeum, 4 Big Rivers, Seoul-Incheon Canal, flood relief and environmental facilities projects.
- Development projects requiring project financing(SOC, BTL, etc.)
- Super tall building, multi-use building, office building, hotel, resort and condo.
- Urban and housing environment improvement projects such as redevelopment, reconstruction, newtown, etc.
- Construction project which require special care due to project complexity or when there is lack of skilled personnel
- All other work which owners deem necessary

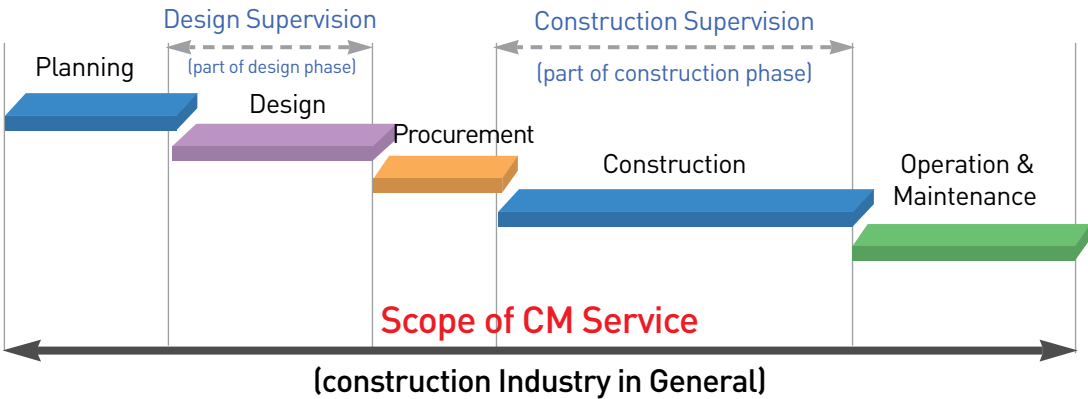

What is CM?

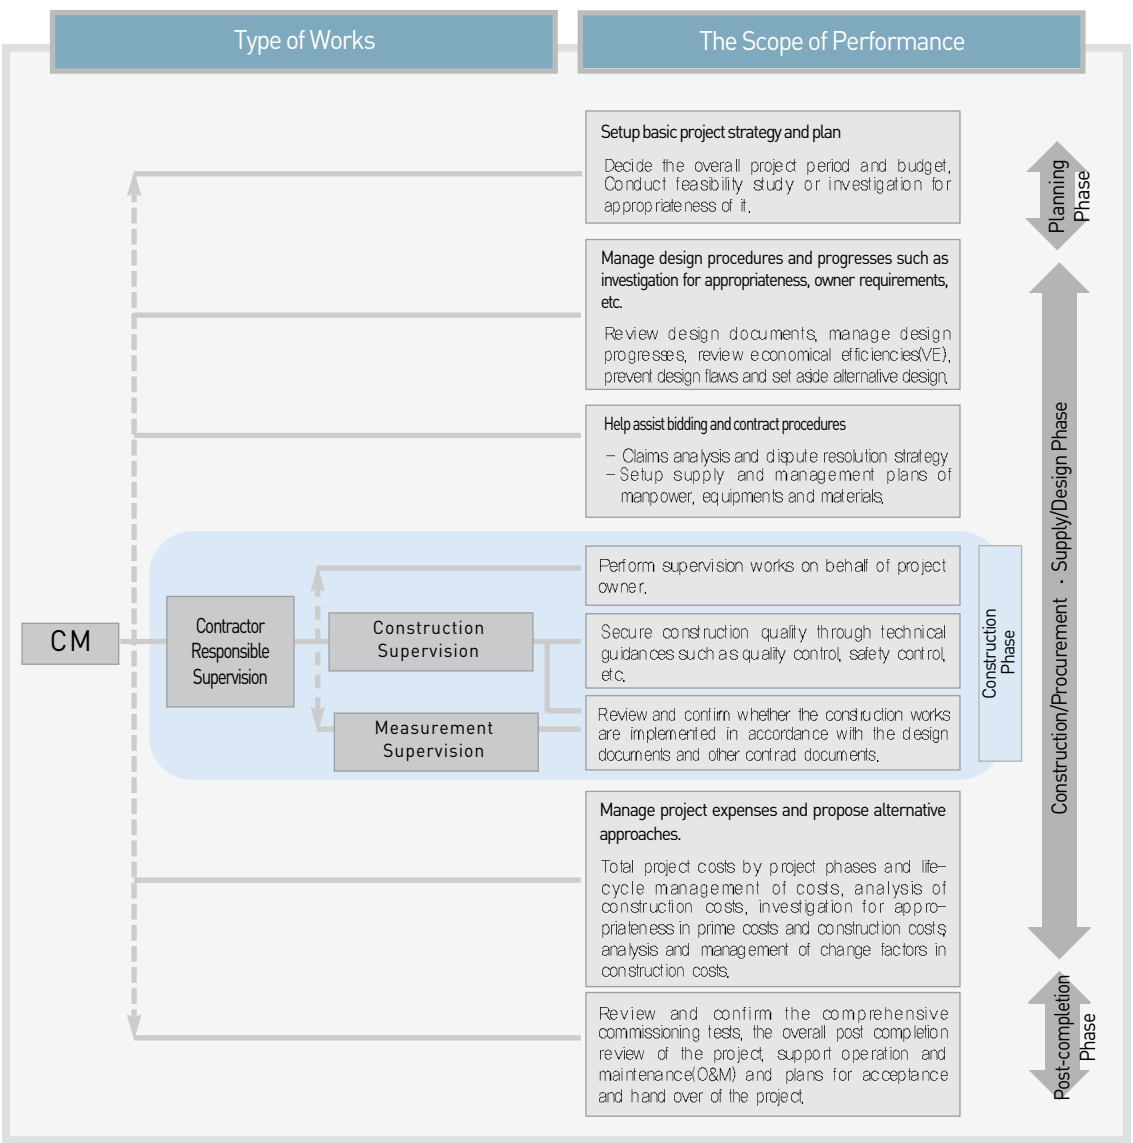

The Scope and Performances of CM

(2) Stages of CM services

Project Phase / Function	Planning	Design Phase	Procurement Phase	Construction Phase	Post-completion Phase
Basic Concept & FS	↔				
Contract Management	↔	↔	↔	↔	
Cost Management	↔	↔	↔	↔	↔
Design Management		↔	↔	↔	
Time Management		↔	↔	↔	
Quality Control		↔	↔	↔	↔
Enviromental Management		↔	↔	↔	↔
Safety control		↔	↔	↔	

What is CM?

What is CM?

Benefits

- Formmulating basic concept, supporting to setup project plan, conducting feaslbtily study and review makes project facilitation and prevent project implementation flaws.
- Consistant implementation of the project, prediction of various issues and problems and preparation of courtemermeasues for these problems and issues, efficient implementartion of the project by provision of swif and appropriate information to the owner.
- Improvement of project quality and reduction of costs through effective management by specialized manpower.
- Minimizing waste factors by preventing project from frequent contrect and design changes.
- Prevention of claims (or disputes) and effective countermeasures for them.
- Pursuti of effective project implementation by establishing the cooperative net work among the project stakeholders.
- Approximately 10to 30% reduction of project costs and period although are some differences between projects.

Comparison of Performance Scheme between CM and Construction Supervision(CS)

Classification	Construction Management(CM)	Construction Supervision(CS)
Function	- The overall management of a project on behalf of project owner	- perform a part of CM works in design and construction phases, mainly focuses on QC
Performance Scheme	- Realize project success (maximization of business profits) ※ CM not only supervises the project, but also performs such activities as monitoring, consulting and advising comprehensively and systematically the issues of project expenses, progresses, quality, environment, etc based on accurate future prediction and current situation. [preventive and post corrective function]	- Conduct measurement just before commence ment of works, out come-confirm oriented performances ※ In other word, design and construction supervisions are outcome oriented performances to secure quality, limited control activities ※ CS performs legal and administrative procedures rather than the enhancement of owner satisfaction [post corrective function]

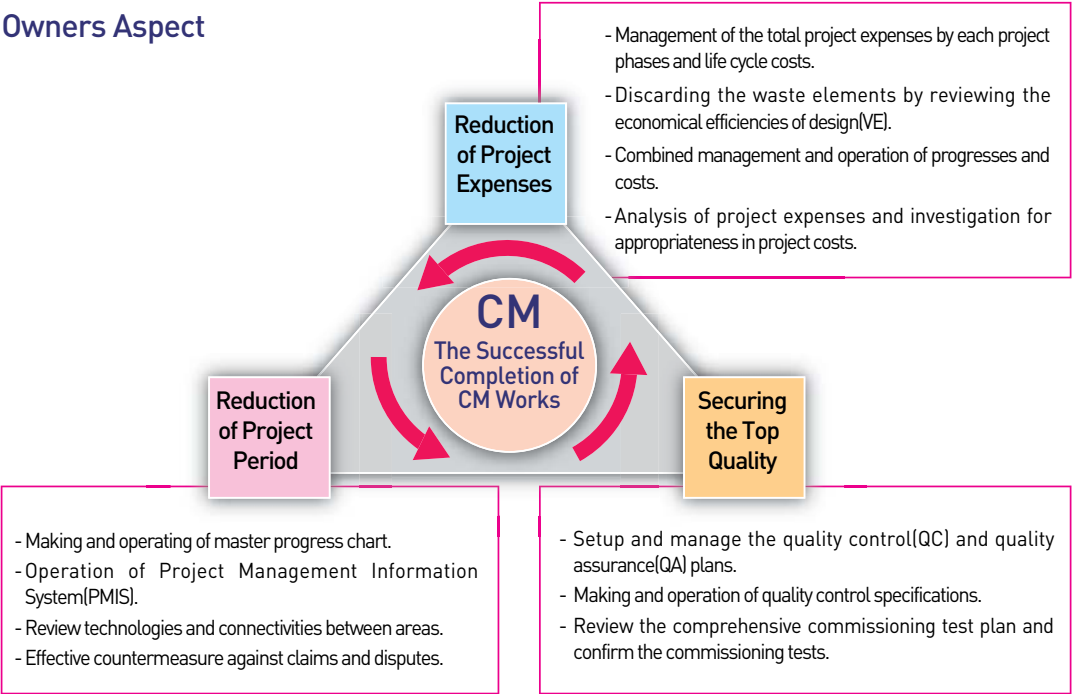

※ Current system practiced in construction in Korea

What is CM?

Benefits

Owners Aspect

Socio-Economic Aspect

Should CM be developed as one of three(3) axes of construction industry(management, design and construction), this will certainly bring forth not only the reduction of project period and costs, but the improvement of project quality. Accordingly as a result of expansion of CM works,

- ① Promotion of construction consulting industry and incomedistribution will take place by creating a new area of business
- ② Creation of new jobs and expansion of things to do will be Realized
 - Create new jobs with introduction of CM professional qualifications
 - Increase in job security and possible creation of jobs for not only construction related specialists butalso for lawyers, accountants, tax specialist, labor consultants, appraisers, holders of qualifications recognized by the government, financial experts and administrative professionals.

What is CM?

Size of the Construction Market in Korea

Total CM volume (2001~2011) : \$1.83 billion

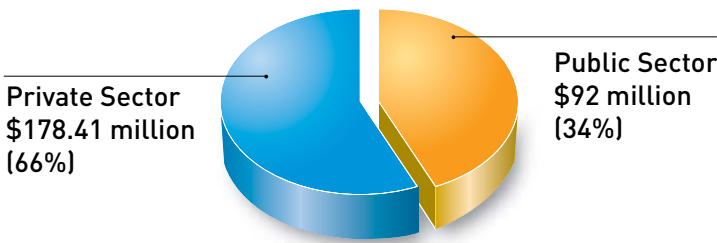

- In recent years, the market volume is in the scale of \$250 million ~ \$416 million per year

In the USA, CM makes up 52% of the domestic construction market but in Korea it is only 7%.

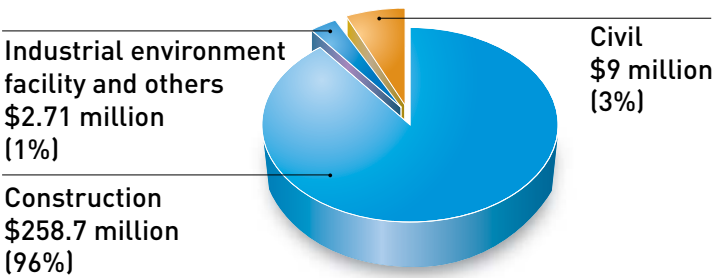

<Per Sector >

: CM in private sector (59%) is more widely than in the public sector (41%)

<Per Area of Work >

: Construction (96%) is the main area of work. Civil and other areas of work (4%) are negligible.

What is CM?

Size of the Construction Market in Korea

※ U.S.A

CM market volume for 2010 in the US is \$518 billion which represents 52.14% of its construction market and it is increasing every year.

Classification	2004	2005	2006	2007	2008	2009	2010
Total Construction	991.36	1,104.14	1,167.22	1,152.35	1,067.56	907.79	803.61
CM Market Volum	223.29	247.85	292.10	391.53	450.84	490.09	518.40
CM at Risk	54.29	63.10	74.10	89.78	103.34	89.34	78.40
CM for Fee	169.00 (6.76)	184.75 (7.39)	218.00 (8.72)	301.75 (12.07)	347.50 (13.90)	400.75 (16.03)	440.00 (17.60)
CM market share	18.54%	18.01%	20.69%	27.81%	33.28%	43.42%	52.14%

Remarks

1. Source : ENR
2. CM for Fee is consulting fee base and CM at Risk accounts for project cost plus fee.
3. CM for Fee is calculated 40% of the total project costs and CM at Risk reflects the real costs and expenses.
